SUMMARY

Motivated third-year B.Tech **Computer Science & Engineering** student (Expected Graduation: 2028) with hands-on experience in **Python**, **Java**, **Django**, **SQL**, **Node.js**, **React**, and **AI API** integration. Proven track record of building full-stack web applications, **AI**-powered tools, and database management systems. Seeking **Software Developer** and **Python Developer** internship opportunities.

TECHNICAL SKILLS

Languages: Python, **Java**, **SQL**, **C++**, **JavaScript**, **HTML**, **CSS**

Frameworks: Django, **Node.js**, **React**

Databases: SQLite, **SQL** / **Database Mgmt**

AI / **API: Google Gemini API**, **REST APIs**

Core CS: OOP, **Data Structures & Algorithms (DSA)**

Tools: Git, **GitHub**

CERTIFICATIONS & ACHIEVEMENTS

AICTE OIB-SIP Internship Certificate — Oasis Infobyte (2025)

Generative AI Essentials — TCS iON

Python (Basic) — HackerRank Certified (Sep 2025)

HackerRank: Solved 50+ **Python** coding challenges

Leadership: Techneon **C++** Quiz Game Team Lead

PROJECTS

Online Voting System | ***Python, Django, SQLite, Digital Image Processing***

- Built a secure academic voting web application enforcing a strict one-person-one-vote election workflow.
- Implemented **2-Step Verification** integrating secure OTP verification and face authentication via **Digital Image Processing**.
- Integrated a Voice Assistant for audible OTP delivery during login to enhance accessibility and user experience.
- Developed an admin dashboard for candidate management, voter authentication, and real-time election result tracking.

Student Complaint Management System | ***Java, SQL, SQLite, OOP***

- Engineered a robust desktop application allowing campus students to submit, categorize, and track grievances in real-time.
- Designed relational **SQL** database tables in **SQLite** for efficient complaint lifecycle management and status tracking.
- Implemented clean **Object-Oriented Programming (OOP)** architecture in **Java** for secure administrative resolution workflows.

KP Bot — AI-Powered Chatbot | ***Node.js, JavaScript, HTML, CSS, Google Gemini API***

- Created a fully functional conversational chatbot offering a ChatGPT-style interactive web interface.
- Integrated **Google Gemini API** with a **Node.js** backend to dynamically handle user prompts and generate context-aware **AI** responses.

EXPERIENCE

Software Development Intern (Java) | *Oasis Infobyte* **Nov 2025 – Dec 2025**

- Architected and deployed the **Student Complaint Management System** utilizing **Java**, **SQL**, and **SQLite** database architecture.
- Streamlined database queries and complaint lifecycle routing, improving automated issue tracking efficiency for campus administration.

Python Development Intern | *Saiket Solution* **May 2025 – Jul 2025**

- Engineered scalable **Python** applications, including a live **Weather Application** fetching dynamic forecast data via **REST APIs**.
- Optimized API response handling and user interaction logic to ensure reliable real-time data rendering.

EDUCATION

Pimpri Chinchwad University, Pune — B.Tech in **Computer Science & Engineering** **Expected: 2028**

- **CGPA:** 7.84

CBSE Board

- **Class XII:** 72.06% | **Class X:** 68.08%
